LIST OF CONTENTS FOR VOLUME 26, 1999

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 1 January

Contents

R.J. Schweikert and R.G Keanini	1	A finite element and order of magnitude analysis of cryosurgery in the lung
T. Bali and T. Ayhan	13	Experimental investigation of propeller type swirl generator for a circular pipe flow
V. Masson and P.M. Carrica	23	Critical heat flux in pool boiling under the effect of adverse dielectrophoretic forces
N. Lu, Y. Zhang and B. Ross	33	Onset of gas convection in a moist porous layer with the top boundary open to the atmosphere
J. Mi and R.A. Antonia	45	Evolution of centreline temperature skewness in a circular cylinder wake
C.-K. Sung	55	Two instability criteria for the stratified flow in horizontal pipe at cocurrent flow conditions
L.P. Chua, S.C. Tung and W.K. Chan	65	Preliminary measurements of wall shear stress
Y. Demirel	75	Irreversibility profiles in a circular Couette flow of temperature dependent materials
S.-M. Chao, S.-M. Wang, S.-C. Chen and F. Gao	85	Evaluation of gas pressure dynamics for gas-assisted injection molding process
K.A. Yih	95	Free convection effect of MHD coupled heat and mass transfer of a moving permeable vertical surface
A. Campo	105	Bounds of the optimal conditions of forced convective flows inside multiple channels whose plates are heated by a uniform flux
S. Chantasiriwan	115	Comparison of three sequential function specification algorithms for the inverse heat conduction problem
M. Ünsal	125	Solution of the complex eigenvalue problem for transient laminar forced convection inside tubes
O. Aydin	135	Transient natural convection in rectangular enclosures heated from one side and cooled from above
T.-Y. Na and I. Pop	145	A note to the solution of Cheng-Chang equation arising in free convection in porous media

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 2 February

Contents

A. Barletta	153	Laminar convection in a vertical channel with viscous dissipation and buoyancy effects
P.-H. Chen and J.-M. Miao	165	Endwall effect on the mass transfer in a square open cavity
H. Teng and T.S. Zhao	177	Influence of interfacial mass transfer and chemical reaction on breakup of low-solubility fluid jets in water
C.C.M. Rindt, J.J.M. Sillekens and A.A. van Steenhoven	187	The influence of the wall temperature on the development of heat transfer and secondary flow in a coiled heat exchanger
N. Al-Khalidy	199	Analysis of boundary inverse heat conduction problems using space marching with Savitzky-Gollay digital filter
D. Gao	209	Numerical solution for a heat conduction problem
M. Abd El-Hakiem, A.A. Mohammadein, S.M.M. El-Kabeir and R.S.R. Gorla	219	Joule heating effects on magnetohydrodynamic free convection flow of a micropolar fluid
S.Gh. Etemad and F. Bakhtiari	229	General equations for fully developed fluid flow and heat transfer characteristics in complex geometries
L. Liu, H. Tan and Q. Yu	239	Inverse radiation problem of temperature field in three-dimensional rectangular furnaces
R. Tsai	249	A simple approach for evaluating the effect of wall suction and thermophoresis on aerosol particle deposition from a laminar flow over a flat plate
K.A. Yih	259	Radiation effect on natural convection over a vertical cylinder embedded in porous media
A. Yigit	269	A numerical study of heat and mass transfer in falling film absorber
H.A. Abdel-Aal	279	Division of fractional heat: The dependence on sliding parameters
H.A. Abdel-Aal	289	A note on the intrinsic thermal response of metallic pairs in dry sliding friction

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 3 April

Contents

N. Laraqi	299	Thermal constriction resistance of coated solids — static and sliding contacts
Z.W. Liu, W.W. Lin and D.J. Lee	311	Boiling of FC-72 on straight pin fin
H. Kawashima, F. Kuwahara and A. Nakayama	319	Similarity solutions for pressure-driven boiling flows in capillary porous media
R. Chouikh, A. Guizani and M. Maalej	329	Numerical study of the laminar natural convection flow around an array of two horizontal isothermal cylinders
Y. Hu, S. Huang and M. Shi	339	A generalized analysis of close-contact melting processes in two-dimensional axisymmetric geometries
T.H. Dai, R.Z. Qian and Y.F. Ai	349	Calculations of the time-averaged local heat transfer coefficients in circulating fluidized bed
J.C. Bokar	359	The estimation of spatially varying albedo and optical thickness in a radiating slab using artificial neural networks
L.P. Chua, S.C.M. Yu, H.L. Leo and W.K. Chan	369	Comparison of flow characteristics of enlarged blood pump models with different impeller design
C.C. Fan and S.P. Liaw	379	Computation of boiling water on circular finned tubes
M.D. Landon and A. Campo	389	Optimal shape for laminar natural convective cavities containing air and heated from the side
G.A. Ledezma and A. Campo	399	Computation of the Nusselt number asymptotes for laminar forced convection flows in internally finned tubes
H. Umur and I. Karagoz	411	An investigation of external flows with various pressures and surfaces
M. Mamou and P. Vasseur	421	Hysterisis effect on thermosolutal convection with opposed buoyancy forces in inclined enclosures
K.A. Yih	431	Coupled heat and mass transfer by natural convection adjacent to a permeable horizontal cylinder in a saturated porous medium
H.A. Abdel-Aal	441	On the size of hot spots in the dry sliding of metals

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 4 May

Contents

A. Griesinger, W. Heidemann and E. Hahne	451	Investigation on measurement accuracy of the periodic hot-wire method by means of numerical temperature field calculations
R. Krishna, J. Ellenberger and C. Maretto	467	Flow regime transition in bubble columns
E. Ringuet, S. Meunier-Guttin-Cluzel, C. Rozé and G. Gouesbet	477	Experimental study of nonlinear coupling between two oscillators in one-dimensional Marangoni convection
A. Meslem, C. Beghein, C. Inard and F. Allard	487	Lois de decroissance d'un jet turbulent tridimensionnel vertical de paroi impactant a forces de poussee defavorables
W.B. Fox, N.S. Grewal and D.A. Moen	499	Wall-to-bed heat transfer in circulating fluidized beds
G.Ya. Aleshin, J.C. Mollendorf and J.D. Felske	509	The temperature response of a metallic rod near a "steam explosion"
Q. Chen and R.C. Prasad	513	Simulation of a vapour-compression refrigeration cycles using HFC134A and CFC12
C.Y. Wang	523	Diffusion through a tube with partial constriction
G.H. Sedahmed, M.S.E. Abdo, M.A. Amer and G. Abd El-Latif	531	Effect of drag reducing polymers on the rate of mass transfer controlled corrosion in pipelines under developing turbulent flow
S.J. Matysiak and R. Mieszkowski	539	On homogenization of diffusion processes in microperiodic stratified bodies
R.L. Frederick	549	On the aspect ratio for which the heat transfer in differentially heated cavities is maximum
D.A. Tarzia and C.V. Turner	559	Estimation of the occurance of the phase-change process in spherical coordinates
S. Das and R.K. Sahoo	569	Effect of Darcy, fluid Rayleigh and heat generation parameters on natural convection in a porous square enclosure: A Brinkman-extended Darcy model
D. Tolmac and M. Lambic	579	The mathematical model of the temperature field of the rotating cylinder for the contact dryer
H.A. Abdel-Aal	587	On the bulk temperatures of dry rubbing metallic solid pairs

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 5 July

Contents

M. Misale and M. Frogheri	597	Influence of pressure drops on the behavior of a single-phase natural circulation loop: preliminary results
J.Y. Tu	607	The influence of bubble size on void fraction distribution in subcooled flow boiling at low pressure
B.R. Becker and B.A. Fricke	617	Freezing times of regularly shaped food items
B.R. Becker and B.A. Fricke	627	Food thermophysical property models
K.-H. Cho, S. Kim and Y.-J. Lee	637	A fast EIT image reconstruction method for the two-phase flow visualization
J.C. Sautet, M. Ditaranto, J.M. Samaniego and O. Charon	647	Properties of turbulence in natural gas-oxygen diffusion flames
B.I. Kilkis and A.S.R. Suntur	657	Development of a unified heat transfer model with special emphasis on thermal conduction
Ch. Ranganayakulu and K.N. Seetharamu	669	The combined effects of longitudinal heat conduction, flow nonuniformity and temperature nonuniformity in crossflow plate-fin heat exchangers
S.A. Said and B.A. Akash	679	Experimental performance of a heat pipe
J.L. Xia, B.L. Smith, T. Zierer, J. Schmidli and G. Yadigaroglu	685	Study of turbulent flow characteristics in a 180° -bend annular diffuser with blowoff
M.E. Sayed-Ahmed	695	Forced convection heat transfer of a Robertson-Stiff fluid between two coaxial rotating cylinders
S.-S. Hou, C.-H. Tseng	705	The influence of downstream external heat loss on extinction of dilute spray flames
A.J. Chamkha and C. Issa	717	Mixed convection effects on unsteady flow and heat transfer over a stretched surface
D. Mishra, K. Muralidhar and P. Munshi	729	Isotherms in a horizontal differentially heated cavity at intermediate Rayleigh numbers
T.H. Mai, N. Chitou and J. Padet	739	Method for the heat exchanger effectiveness calculation under variable dynamic conditions
Announcement	749	The 12th International Symposium on Transport Phenomena (ISTP-12)
Announcement	750	International Symposium on Heat Transfer in Gas Turbine Systems "Turbine-2000"

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 6 August

Contents

C.A. Hall III, E.K. Glakpe and J.N. Cannon	751	Unified semi-analytic solutions for freezing with two coalescing fronts
L. Kalla, M. Mamou, P. Vasseur and L. Robillard	761	Multiple steady states for natural convection in a shallow porous cavity subject to uniform heat fluxes
S.P. Bhattacharya	771	Apparent emittance of non-isothermal particulate deposits
R. Krishna, M.I. Urseanu, J.M. van Baten and J. Ellenberger	781	Wall effects on the rise of single gas bubbles in liquids
M.M. Kaminski	791	Monte-Carlo simulation of effective conductivity for fiber composites
M. Kaminski and T.D. Hien	801	Stochastic finite element modeling of transient heat transfer in layered composites
J.-S. Yoo	811	Prandtl number effect on transition of free-convective flows in a wide-gap horizontal annulus
K.A. Yih	819	MHD forced convection flow adjacent to a non-isothermal wedge
M.-H. Chang and C.-H. Cheng	829	Predictions of lid-driven flow and heat convection in an arc-shape cavity
W.X. Jin, S.C. Low and S.C.M. Yu	839	Some experimental observations on the single and multi-phase flow patterns in a model flash evaporation chamber
S. Wongwises, A. Pornsee and E. Siroratsakul	849	Gas-wall shear stress distribution in horizontal stratified two-phase flow
A. Daloglu	861	Study on overall heat transfer coefficient for a rotating cavity type heat exchanger
A. Valencia and C. Orellana	869	Simulation of turbulent flow and heat transfer around rectangular bars
F.A. Banat, F.A. Al-Rub, R. Jumah and M. Shannag	879	Theoretical investigation of membrane distillation role in breaking the formic acid-water azeotropic point: comparison between Fickian and Stefan-Maxwell-based models
A. Raptis	889	Radiation and viscoelastic flow
ANNOUNCEMENT	897	The 12th International Symposium on Transport Phenomena (ISTP-12)

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 7 October

Contents

G.Y. Han and P.A. Secker, Jr.	899	Mathematical modeling and transient thermal-hydraulic analysis of boiling water reactors
G.Y. Han, T.P. Stanley and P.A. Secker, Jr.	909	Thermal-hydraulic modeling and transient analysis of pressurized water reactors
R.C. Aldredge and V. Vaezi	919	Turbulence generation upstream of an annular premixed flame
F.L. Tan and K.C. Leong	925	An experimental investigation of solidification in a rectangular enclosure under constant heat rate condition
C.-Y. Cheng	935	Effect of a magnetic field on heat and mass transfer by natural convection from vertical surfaces in porous media - an integral approach
D.A.S. Rees and I. Pop	945	Free convective stagnation-point flow in a porous medium using a thermal nonequilibrium model
R. Tovar, F.E. Avila, J. Rojas and B. Vargas	955	Buoyancy driven flow of two stratified liquids in a cavity
R. Krishna and J.M. van Baten	965	Rise characteristics of gas bubbles in a 2D rectangular column: VOF simulations vs experiments
K.S. Sujatha, A. Mani and S.S. Murthy	975	Experiments on a bubble absorber
J.F. Nastaj	985	Application of the pulse method of a plane heat source for determination of thermophysical and relaxation properties of the disordered porous materials
Z. Guo and S. Maruyama	997	Scaling anisotropic scattering in radiative transfer in three-dimensional nonhomogeneous media
S. Kim and B.J. Chung	1009	Estimation of the turbulent mixing rate for low Prandtl number flows through rod bundles
O. Aydin	1019	Aiding and opposing mechanisms of mixed convection in a shear- and buoyancy-driven cavity
P.T. Lacava, A.P. Pimenta, C.A. Gurgel Veras and J.A. Carvalho, Jr.	1029	Theoretical analysis of aqueous residues incineration with oxygen enriched flames
K.A. Yih	1041	Mixed convection about a cone in a porous medium: the entire regime

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1999 Volume 26, Number 8 November

Contents

P.G. Kosky, D.H. Maylotte and J.P. Gallo	1051	Angstrom methods applied to simultaneous measurements of thermal diffusivity and heat transfer coefficients: Part 1 Theory
D.H. Maylotte, P.G. Kosky and J.P. Gallo	1061	Angstrom methods applied to simultaneous measurements of thermal diffusivity and heat transfer coefficients: Part 2 Experimental
N. Zhang and D.F. Chao	1069	Mechanisms of convection instability in thin liquid layers induced by evaporation
N. Zhang and D.F. Chao	1081	Models for enhanced boiling heat transfer by unusual Marangoni effects under microgravity conditions
J. Shen, K. Spindler and E. Hahne	1091	Pool boiling heat transfer of refrigerant mixtures R32/R125
K.-T. Ma and C. Pan	1103	The effect of heated wall thickness and materials on nucleate boiling at high heat flux
B. Goyeau and D. Gobin	1115	Heat transfer by thermosolutal natural convection in a vertical composite fluid-porous cavity
A. Barletta	1127	On fully-developed mixed convection and flow reversal of a power-law fluid in a vertical channel
K.S. Ha and S. Choi	1139	Cross-sectional characteristics of visible emission spectra in partially premixed flames
V.R. Abdalla, J.A. Carvalho Jr. and M.A. Ferreira	1151	An investigation on parallel, divergent and convergent acetylene dual jet diffusion flames
F. Kowsary and M. Arabi	1163	Monte Carlo solution of anisotropic heat conduction
A. Daloglu and T. Ayhan	1175	Natural convection in a periodically finned vertical channel
A. Postelnicu and I. Pop	1183	Similarity solutions of free convection boundary layers over vertical and horizontal surfaces in porous media with internal heat generation
